## 33. Цепи с взаимной индуктивностью.

Коэффициент связи  $k = \frac{M}{\sqrt{L_1 L_2}}$ 

 $i=I_m sin at$ 

$$e_1 = -L_1 \frac{di}{dt} - M \frac{di}{dt} = -(\omega L_1 + \omega M) I_m cos \quad \omega t$$

$$e_2 = -L_2 \frac{di}{dt} - M \frac{di}{dt} = -(\omega L_2 + \omega M) I_m cos \quad \omega t$$

## Воздушный трансформатор

$$U_{I} = R_{I}I_{I} - E_{I} = R_{I}I_{I} - (-jX_{LI}I_{I} - jX_{M}I_{2}) = (R_{I} + jX_{LI})I_{I} + jX_{M}I_{2})$$

$$E_{2} = -jX_{L2}I_{2} - jX_{M}I_{I} = I_{2}R_{2} + I_{2}Z_{H}$$
